

Home-Office Seating — Market Brief 2026

Aldermoor Market Intelligence · January 2026 · Internal estimates

Key takeaways

The home-office seating market is growing fastest in Asia-Pacific. Online sales dominate, and returns are driven by comfort and size. The USD 200–399 band is the largest mid-market band.

1. Market size by region (retail value, 2025)

Region	Market size 2025 (USD bn)	CAGR 2026–2030
North America	2.9	4.8%
Europe	2.1	5.6%
Asia-Pacific	1.6	7.9%

2. Unit share by price band

Price band	Share of units
Under USD 200	38%
USD 200–399	34%
USD 400–799	21%
USD 800 and above	7%

3. Channels and returns

Online channels account for 62% of home-office chair unit sales. The average online return rate for task chairs is 14%.

Return reason	Share of returns
Uncomfortable	31%
Too big for the space	23%
Damaged in transit	18%
Assembly problems	12%
Other	16%

4. Consumer trends

Small-space living: new urban apartments are getting smaller, and a growing share of remote workers use a bedroom corner or a converted closet as their office.

Sustainability with proof: shoppers respond to specific recycled-content percentages; vague 'eco' claims face growing regulatory scrutiny in the EU.

Assembly as a brand moment: brands that ship chairs in a single box with tool-free or one-tool assembly report fewer support contacts.
